23. Problem: (use additional Sheets if necessary)
Criteria 1737 of ticket RS-6A-05 calls for the cold and warm starting of the STMGT Request Manager server. The STMGT Request Manager server does not require a start up temperature, because it has no persistant data associated with it.

24. Proposed Solution: (use additional sheets if necessary)
The text for criteria 1737 should be modified, deleting the reference to STMGT Request Manager server for a cold and warm start for testing.

25. Alternate Solution: (use additional sheets if necessary)
N/A

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
The requirement will remain un-testable, due to the fact that the conditions can not be created to demonstrate a cold and warm start.
